

30. JUNIT TESTING TO CHECK WHETHER THE GIVEN NUMBER IS PALINDROME OR NOT

T.SUMANTH

192011452

AIM

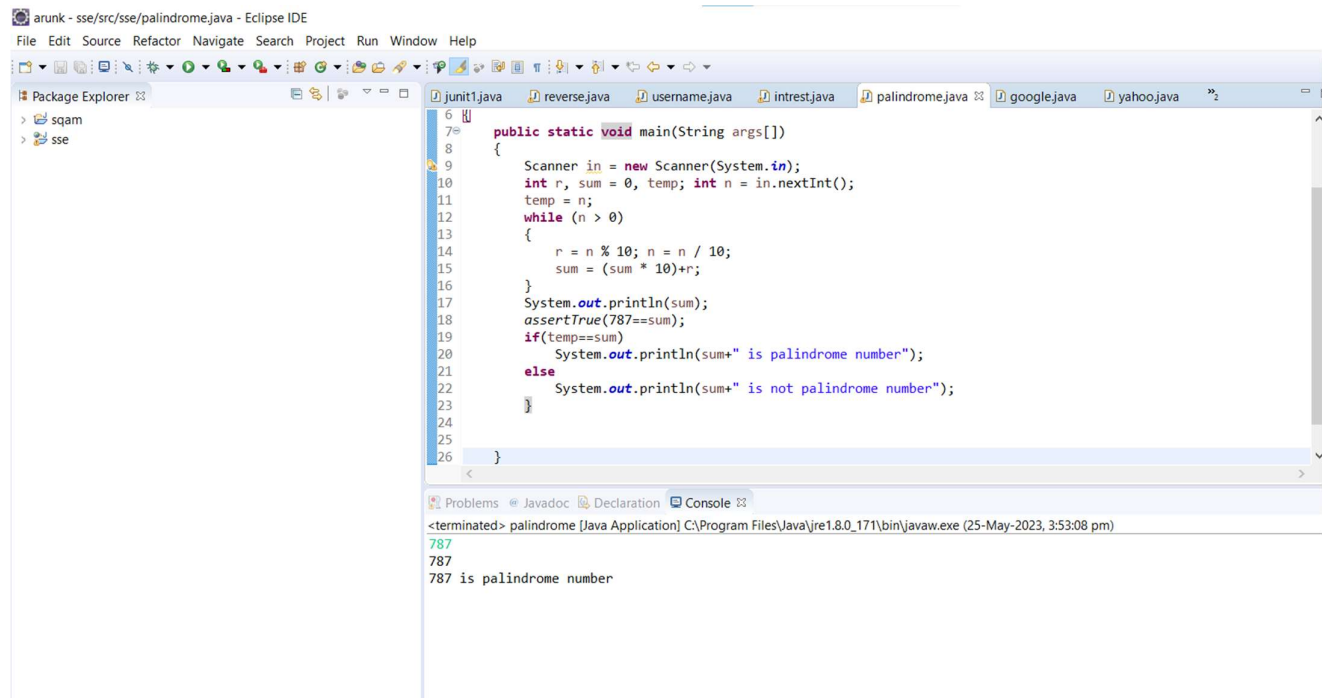

To Perform junit Testing to Check Whether the given number is palindrome or not.

PROGRAM

```
package sse;

import java.util.Scanner;
import static org.junit.Assert.assertTrue;
public class palindrome
{
    public static void main(String args[])
    {
        Scanner in = new Scanner(System.in);
        int r, sum = 0, temp; int n = in.nextInt();
        temp = n;
        while (n > 0)
        {
            r = n % 10; n = n / 10;
            sum = (sum * 10)+r;
        }
        System.out.println(sum);
        assertTrue(787==sum);
        if(temp==sum)
            System.out.println(sum+" is palindrome number");
        else
            System.out.println(sum+" is not palindrome number");
    }
}
```

OUTPUT

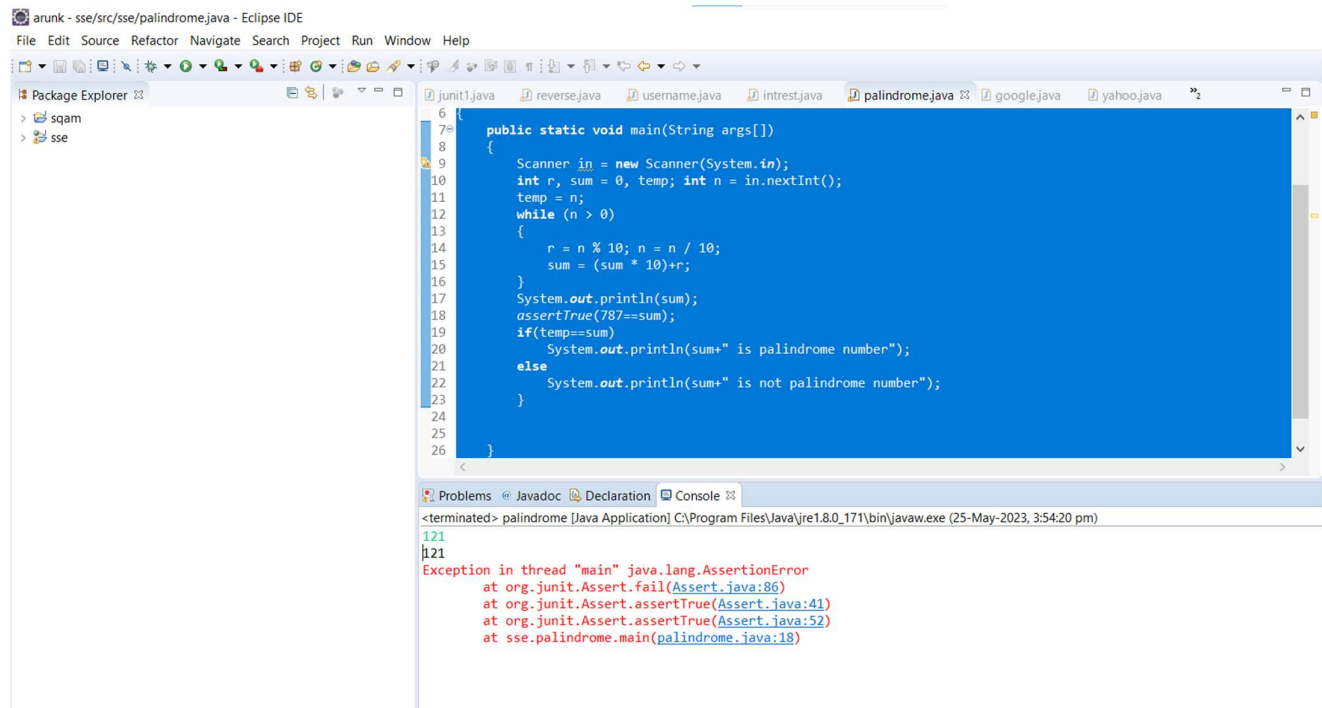

The screenshot shows the Eclipse IDE with the file `palindrome.java` open. The code is a Java application that checks if a number is a palindrome. The console output shows the program terminated successfully, printing the number 787 and confirming it is a palindrome.

```
arunk - sse/src/sse/palindrome.java - Eclipse IDE

6 public static void main(String args[])
7 {
8     Scanner in = new Scanner(System.in);
9     int r, sum = 0, temp; int n = in.nextInt();
10    temp = n;
11    while (n > 0)
12    {
13        r = n % 10; n = n / 10;
14        sum = (sum * 10) + r;
15    }
16    System.out.println(sum);
17    assertTrue(787==sum);
18    if(temp==sum)
19        System.out.println(sum+" is palindrome number");
20    else
21        System.out.println(sum+" is not palindrome number");
22 }
23
24

26

Problems Javadoc Declaration Console
<terminated> palindrome [Java Application] C:\Program Files\Java\jre1.8.0_171\bin\javaw.exe (25-May-2023, 3:53:08 pm)
787
787
787 is palindrome number
```

The screenshot shows the Eclipse IDE with the file `palindrome.java` open. The code is the same as in the previous screenshot. The console output shows the program terminated with an exception, indicating a failure in the JUnit testing process.

```
arunk - sse/src/sse/palindrome.java - Eclipse IDE
File Edit Source Refactor Navigate Search Project Run Window Help

Package Explorer
> sqam
> sse

6 {
7 public static void main(String args[])
8 {
9     Scanner in = new Scanner(System.in);
10    int r, sum = 0, temp; int n = in.nextInt();
11    temp = n;
12    while (n > 0)
13    {
14        r = n % 10; n = n / 10;
15        sum = (sum * 10) + r;
16    }
17    System.out.println(sum);
18    assertTrue(787==sum);
19    if(temp==sum)
20        System.out.println(sum+" is palindrome number");
21    else
22        System.out.println(sum+" is not palindrome number");
23 }

```

RESULT

Hence the junit Testing Check Whether the given number is palindrome or not performed successfully.
