FLOWCHART

```
         ( Start )
             |
   "Enter the Dividend"
        GET Dd
             |
   "Enter the Divisor"
        GET Dr
             |
      Q ← floor(Dd / Dr)
             |
        R ← Dd%dr
             |
   PUT "Quotient isv "+Q¶
             |
   PUT "Remainder is "+R¶
             |
          ( End )
```
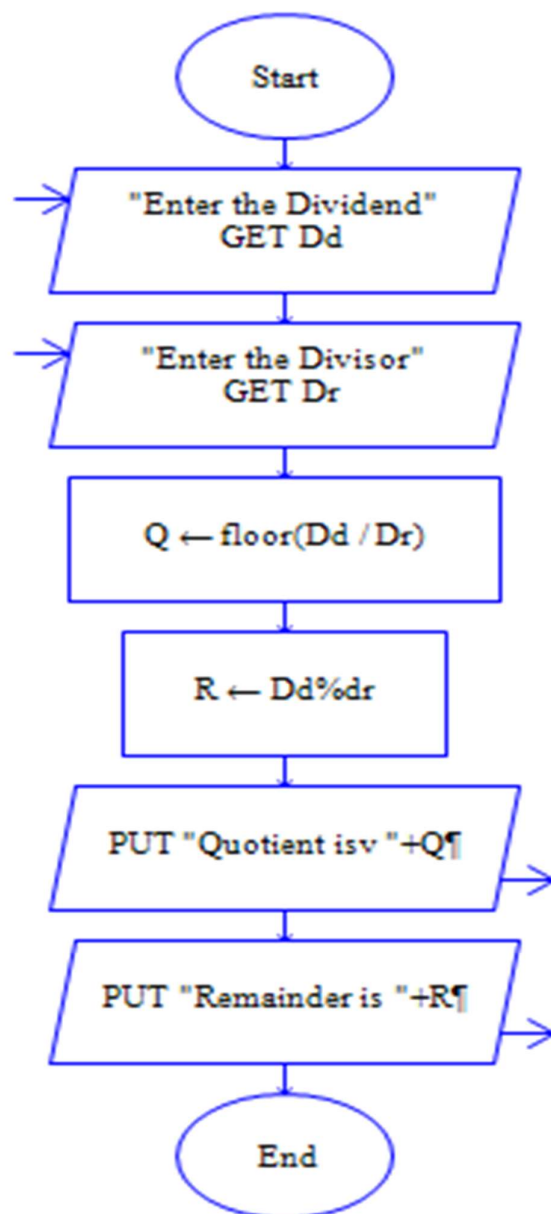

OUTPUT

DIVIDEND 9 AND DIVISOR 4

Quotient isv 2
Remainder is 1
----Run complete. 8 symbols evaluated.----

RESULT:

The program is executed and verified successfully
